Suman Giri

+91 8972698659 | suman2003giri@gmail.com | Kolkata , West Bengal | LinkedIn | Portfolio | GitHub

Proficient in Python, SQL, Machine Learning (Scikit-learn, TensorFlow), FastAPI, Streamlit, and Data Analysis. Experienced in developing end-to-end ML applications with expertise in predictive modeling,and AI-powered solutions.

Domain/Functional Areas

- Artificial Intelligence & Machine Learning
- Data Science & Analytics
- Business Intelligence & Data Visualization

Key Skills

Programming Languages: Python, Java, C, SQL, JavaScript

Machine Learning & AI: Scikit-learn, TensorFlow, Pandas, NumPy, Model Building, Feature Engineering, Data Preprocessing

Data Analytics & Visualization: Power BI, Excel, Data Analysis, Data Visualization, Exploratory Data Analysis (EDA)

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Streamlit

Cloud & Database: MongoDB, MySQL, Cloud Basics

Professional Experience

PCS Global (Perennation Computer Solutions Global Pvt. Ltd.) **Remote**

Data Scientist Intern (Internship) Mar 2026 - May 2026

- Engineered a machine learning model that increased student performance prediction accuracy from 86% to 93% using demographic and educational data.
- Applied feature engineering and model optimization techniques to enhance predictive performance and reduce overfitting.
- Automated data preprocessing and EDA, reducing data preparation time by 30% and accelerating model development.

Projects

Credit Risk Modeling - **Finance** Project Link

[Python | Scikit-learn | Streamlit] May 2026 - Jul 2026

- Built a credit risk classification model that attained 94% classification accuracy through Optuna-based hyperparameter tuning and feature engineering.
- Processed and analyzed 50,000 customer records, improving model recall by 12% and enabling better credit risk assessment.
- Constructed a Streamlit web application that streamlined Credit Risk Modeling, reducing manual assessment time by 40% for underwriting teams.

Expense Tracking System - **Personal Finance** Project Link

[Python | FastAPI | Streamlit] Feb 2026 - Mar 2026

- Designed a full-stack expense tracking system using Python, FastAPI, and Streamlit to manage expenses, track budgets, and visualize spending through interactive charts.
- Automated expense tracking and report generation, reducing manual expense management effort by 60% while providing real-time financial insights.
- Structured the application with backend, frontend, testing modules, and application logging, improving debugging, monitoring, and maintainability.

Health Insurance Premium Prediction - **Healthcare** Project Link

[Python | Scikit-learn | Streamlit] Jan 2026 - Feb 2026

- Developed a machine learning regression model that achieved an R^2 score of 0.91 for predicting health insurance premiums using demographic, lifestyle, and medical risk factors.
- Enhanced model performance through advanced data preprocessing, feature engineering, and hyperparameter optimization, reducing prediction error by 18% compared to the baseline model.
- Created an interactive Streamlit interface for instant health insurance premium estimation and personalized risk assessment, reducing prediction processing time by 40%.

Certifications

- **Master Machine Learning for Data Science & AI: Beginner to Advanced - Code Basics**
  Certification Link
- **Applied Artificial Intelligence – IBM SkillsBuild & CSRBOX - IBM**
  Issued on: Dec 2025 Certification Link

Education

College Of Engineering and Management,Kolaghat **Kolkata,India**

Bachelor Of Technology - CSE(AIML) Aug 2023 - Present

8.46

Achievements

• Completed Data Science internships at CodeAlpha and PCS Global.
• Completed IBM SkillsBuild Applied Artificial Intelligence Project-Based Learning Program.
